

FLOW CHARTS

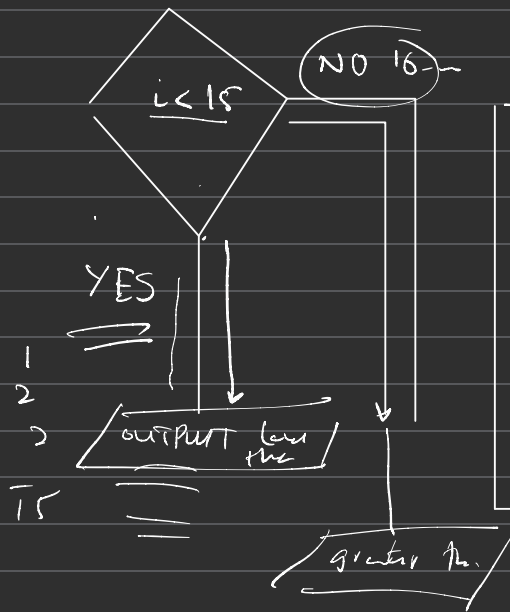

- Flowchart is a graphical representation of a pseudocode
- Flowcharts use different symbols containing information about steps or a sequence of events.

Symbols

Purpose

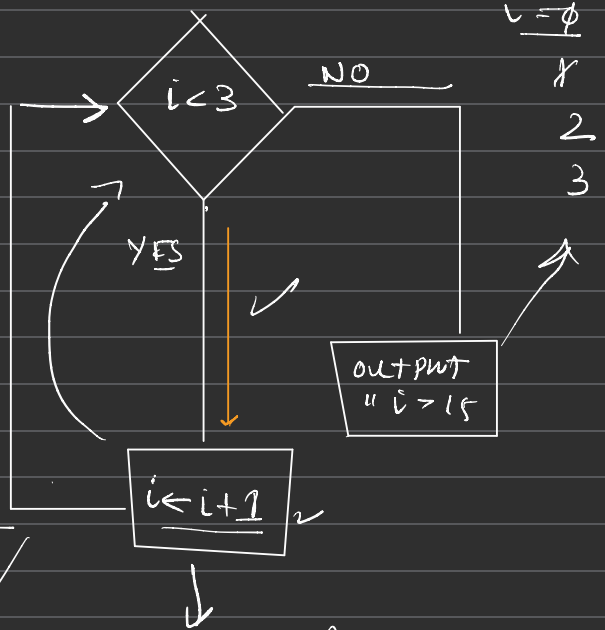

- | Symbols | Purpose |
|----------------|--|
| ① START/STOP | - Marks the starting / Ending of a program. |
| ② Process | - This represents a process like |
| ③ INPUT/OUTPUT | - This represents input/output |
| ④ DECISION | - This is actually IF ELSE |
| ⑤ Loop | <div><div>if ELSE</div><div>FOR i in range 1 to 10:
output i</div><div>WHILE i < 15
output i</div><div>Conditions part of loops</div></div> |

Difference in a IF and a loop
 IF ELSE

IF ELSE may
 array wapis
 nahi kr

loop¹⁶

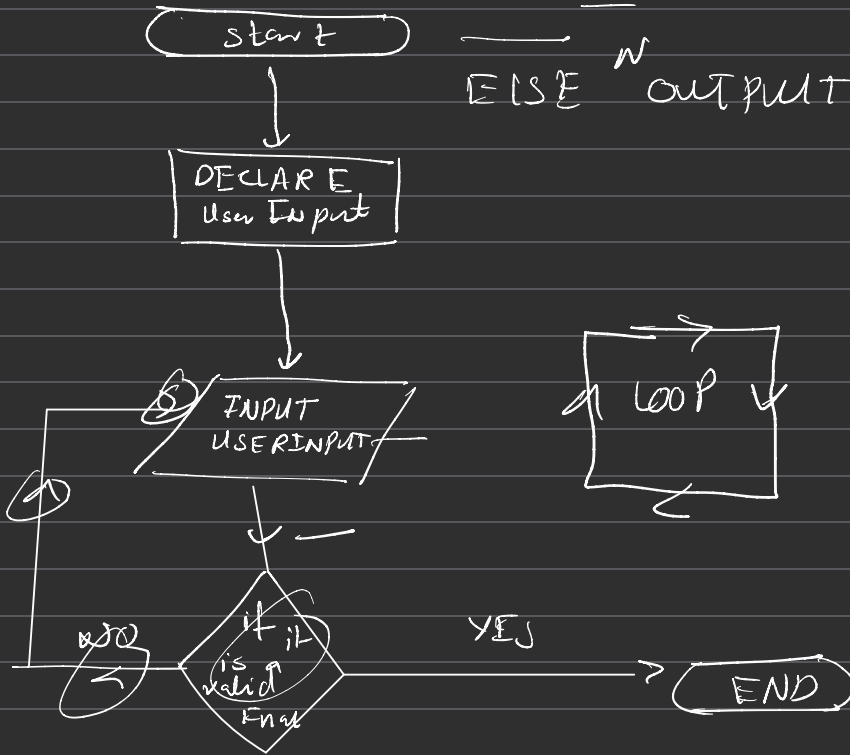

Array ghoran
 kr wapis condition
 may ahi hai

IF i < 15
 OUTPUT "less than"
 ELSE OUTPUT "greater than"

EXAMPLE

if name = "Manrha" ?
YES output "MATCH"
ELSE "NM"

WHILE NOT VALID
INPUT user Input
